Comments: I am writing in protest to the proposed "Stibnite Gold Project", which I believe would seriously and detrimentally impact priceless, precious wilderness areas in the River of No Return area, as well as the headwaters of the Snake River. The resulting pollution and disruption caused by road building, noise, etc. would have enormous impacts on the people and animals who live there, as well as the many people who recreate there.

Please reconsider this short sighted, dangerous course. Thank you.
