Comments: I am opposed to the Stibnite Gold Project because of the environmental concerns raised in the Supplemental Draft Environmental Impact Statement (SDEIS) for this project. This project would negatively impact the fisheries and the ecology of the wilderness. These impacts would be permanent, which is not a fair trade for temporary extraction of the minerals.

Last summer, I took a motorcycle ride through this area proposed for the Stibnite Gold Project. On September 3, 2022, I unexpectedly witnessed hundreds of salmon making their way up Johnson Creek during spawning season. Outside of Alaska, this was the first significant salmon run I had ever seen and it took my breath away. These salmon were within a couple miles of their final destination and had already completed a great journey. The Stibnite Gold Project would put these salmon at risk, along with compromising many other ecological components.

I am opposed to the Stibnite Gold Project. Thank you for your consideration.
