Comments: i think the presednt welcome center should be fixed up a little and that is enough. we donot need a new welcome center as the fs is using this as an excuse to log and burn nature. natures has no importance to them. they log, burn, chemically attack allnature. they are always looking to extract money from nature by logging, mining, grazing and nature isnever left alone to be nature.nature itself in itself has much grandeur and value to the human race, we are destroyihg it in maximum ways and the fs itself is the main attacker. stop their plans every chance you get. they dont revere nature. revering nature is th eonly hope we have as a species.
