Comments: Please deny any permit for this mine expansion. This is the worst and most polluting type of mine.

This mine will be way too close to the Frank Church River of No Return Wilderness. The possible cyanide pollution is way too toxic to be produced anywhere near that river and river basin. The noise, ambient dust and truck traffic caused by the mine as well as any road near and possibly through the wilderness area will drastically disturb if not destroy the wilderness experience. This is such a beautiful and popular recreation area that it must be preserved and not put at risk by this mine.
