Comments: Stibnite Gold Project EIS #50516 means disaster for the environment and for the vulnerable species populations in the area.

We must stop this mindless exploitation of every resource. The cost to the environment and life itself, including but not limited to human life is stupendous and irreparable.

Please, please, refuse the mining permit and require the mining company Perpetua to finish cleaning up the mine site.

Preserve our wilderness! As usual in these cases, the mining applicant egregiously downplays the impact their proposed project would have on the surrounding region. There is not the slightest excuse for this horribly harmful project. Thank you for being there and thank you for holding the line.
