Comments: Hello,

Please do not let this dangerous Mine project to go forward. This is nothing but pure Greed of special interests and total disregard for our disappearing wildlands and spaces.

We don't need another GOLD Mine. What we need is space for wildlife, space for wilderness to be as it was intended not another dug up polluted gold mine that does NOTHING for most of America and certainly NOTHING for the wildlife that depend on this beautiful unspoiled land.

Please to the right and honorable thing, stop this greedy land/water grab as we have everything to lose and nothing to gain.

Thank you and I hope we can count on you for your strong support of our beautiful spaces we have left and not the never-ending greed of special Interests.

Susan Allen
