Comments: The mining proposal (Stibnite Gold Project) near the Frank Church River of No Return Wilderness is unconscionable. At stake is the very integrity of the Wilderness: intact mature forest, solitude, and high-quality coldwater rivers/streams with endangered fish communities, including migratory salmon and resident native trout species. The value of this wilderness and associated Salmon River tributaries to Americans is far greater than the gold that could be extracted at great risk to this pristine environment. Please deny this proposal.
