Comments: I strongly object to the Stibnite Gold Project: both to the proposed road and to the mining operation in general. This area needs remediation and restoration, not further destruction that serves only to increase the wealth of a small already wealthy group. It provides only harm, and no benefit, to the people in the immediate vicinity, the American people in general, and the health of the planet. I urge you to deny the permit for this project and enforce the clean up of the mine site.
