Comments: The Frank Church-River of No Return Wilderness is one of the most magnificent gems on planet Earth, and it must remain that way in perpetuity. Devastating impacts on water, land and wildlife occur even from destructive projects miles away thanks to the powerful transportation modes contained in air and water movement across landscapes.

The Stibnite Gold Project puts not only the Frank Church-River of No Return Wilderness at huge risk of permanent damage, but also the East Fork of the South Fork of the Salmon River and endangered species such as salmon, steelhead, and bull trout.

This wilderness area provides habitat to numerous species of wildlife whose ability to survive is dependent upon lack of human intrusion.

I'm urging the US Forest service to deny the permit for Perpetua Resource's Stibnite Gold Project and require Perpetua to finish cleaning up the mine site immediately.
