Title:

Comments: This mine would DESTROY one of the most pristine ecosystems in our nation!

The destruction of the lands, waters, the pollution of the air, the destruction of a HUGE ecosystem which is home to THOUSANDS OF SPECIES of animals, plants, and microbial biomes, which could NEVER be restored to their pristine condition ( such as it is, with the previous mining operations already having degraded the area substantially, requiring the first nations there to undertake the GARGANTUAN task of cleaning up after those operations' poisonous end-products and mitigating, as best they can, the damages already done), constitutes the destruction of OUR LEGACY TO OUR CHILDREN AND FUTURE GENERATIONS!..These ecosystems are P R I C E L E S S , AND N O AMOUNT OF GOLD OR ANY OTHER "C O M M O D I T Y " CAN EVER MATCH THEIR VALUE AS ONE OF OUR NATION'S MOST PRECIOUS RESOURCES NATURE HAS GIFTED TO US!  
JUST SAY N O !!! TO THIS ECOCIDAL PROJECT!!!
