Comments: The Stibnite Gold Project is a very bad idea. It would seriously impact the Frank Church-River of No Return Wilderness and also the East Fork of the South Fork of the Salmon River. The impacts include noise, pollution and disturbance of wildlife, including such endangered species as salmon, steelhead, and bull trout. The proposed road would go right into the wilderness itself. Incredibly, these impacts have been downplayed in the wilderness evaluation.

The Forest Service needs to deny the permit for Perpetua Resource's Stibnite Gold Project and require Perpetua to finish cleaning up the mine site. Past mining here has already done enough damage to the area.
