Title:

Comments: I am opposed to the the Stibnite Gold Project for the following reasons:

1) The Stibnite Gold Project puts not only the famed Frank Church-River of No Return Wilderness at risk, but also the East Fork of the South Fork of the Salmon River and endangered species such as bull trout & salmon;

2) Under the preferred alternative, mining operations & road construction would cause negative impacts to the River of No Return Wilderness, including increased access to and activity in what are now quiet & lightly-visited places in the Wilderness, noise audible from a nearly 2-mile radius, sediment pollution in streams within the Wilderness, & wildlife disturbance & displacement (The current wilderness evaluation erroneously downplays these impacts);

3) The new proposed road would be located 100 feet from the wilderness boundary & possibly within the Wilderness, as the most likely location for the road seems to be an existing pack trail that dips into the Wilderness;

4) This area, as all others, doesn't need more toxic mining and its impacts;

For these reasons, the Forest Service should deny the permit for Perpetua Resource's Stibnite Gold Project & require Perpetua to finish cleaning up the mine site at its own expense.
