Title:

Comments: As a 50 year resident of Idaho and a 40 year resident living and working and recreating near the South Fork of the Salmon River, I am concerned with the environmental impact of the Stibnite Gold Project. The egress into and out of the area is a year round concern in any seasonal weather condition. Heavy vehicle truck traffic hauling caustic chemicals and fuel will be a hazard all along the roadway. Human life and the environment will not benefit from this enterprise.
