Comments: I strongly request the Forest Service deny a mining permit for Stibnite Gold Project EIS #50516.

This project puts the River of No Return Wilderness, as well as the East Fork of the Salmon River at risk for destructive water pollution, further endangering species of fish already in an endangered status. Noise levels will have a significant degrading impact in the Wilderness Area.

Please deny this permit and require Perpetua Resources to finish cleaning up its mine site and protect this wilderness area from damage. Thank you.
