Title:

Comments: To whom concerned;

The river and land surrounding it are far far more precious than ANY AMOUNT OF GOLD! The human race should not be so prolific as to destroy one of the last remaining wild rivers and the nurturing it provides for a large amount of land and water, not to forget, it was of the last wild places in this country!

In essence "LEAVE IT ALONE! The river and surrounding area is needed for the survival of ALL carbon based life on this planet! Do not take any kind of destruction lightly!
