Comments: I think this is an awful idea and it's my hope that Stibnite Gold project will Not be approved.

I don't see how you could possibly do this without damaging the environment for decades or more. I have major concerns for the possible impact this project could have on the environment. I would like to know if there are any third-party members that will be reviewing the possible impacts this project will have on the environment.. air, rivers, wildlife, water quality of towns? What impact it could have on roads, traffic congestion, erosion, noise pollution?... There are so many damaging side effects to consider. I sincerely hope this project is not approved.
