Comments: The Stibnite Gold Project threatens the fish of the Frank Church-River of No Return Wilderness.

The wilderness evaluation significantly under estimates the impacts. Of this proposal . The new proposed road would sit 100 feet from the wilderness boundary or could even enter the Wilderness, as the most logical location for the road seems to be an existing pack trail that dips into the Wilderness.

The last thing this area needs is more toxic mining and associated impacts.

The Forest Service needs to deny the permit for Perpetua Resource's Stibnite Gold Project and require Perpetua to finish cleaning up the mine site.
