Title:

Comments: I'm really amazed I have to do this, your title is the US Forest service, and what you're proposing is a DISSERVICE to the forest and many pieces of it and multiple negative impacts.

This project puts at risk Frank Church-River of No Return Wilderness, the East Fork of the South Fork of the Salmon River, endangered species including salmon, steelhead, and bull trout.

The disservice to the forest also would include road construction and mining operations with serious impacts to the River of No Return Wilderness, introducing unacceptable noise and sediment pollution in all downstream areas.

The wilderness "evaluation" erroneously downplays these quite major impacts.

The last thing this area needs is more toxic mining and associated impacts.

GET A GRIP ON REALITY, WE DON'T NEED MORE GOLD, you need to deny the permit for Perpetua Resource's Stibnite Gold Project and REQUIRE Perpetua to finish cleaning up the mine site.
