Comments: I am against the Stibnite project for several reasons. Chief among them is my concern for increased and heavy equipment traffic on the entirety of Warm Lake Road. The road is steep and windy and heavily loaded trucks are bound to have severe mishaps. Warm Lake Road travels through beautiful landscapes and is a popular year-round tourist route. I believe the traffic will forever impact and ruin a major draw to our tourism rich county. I worry about the much increased traffic to the Logistics center on Warm Lake road. Those excess vehicles will only add to Hwy 55 traffic up and through Cascade. As well, the vast number of employees we're told who will work a number of days (weeks?) on and then off, will not likely live in Valley County. They will not be boosting the local economies, as they will likely travel to and from their existing homes in other areas of Idaho and Oregon. Why would they bother trying to relocate to Valley County for a few years on and off work? Perpetua stands to earn a ton of money with this venture with Valley County realizing only a miniscule share. I don't think it's worth it.
