Last name: Brubaker

Organization: None

Title:

Comments: I oppose the allowance for the pipeline to pass through the Jefferson National Forest because

1. Fossil fuel will be obsolete sometime this century.
2. A break or leak will cause harm to the forest and its inhabitants.
3. Fossil fuels are the main contributor to climate change.
4. Burying a pipe will disrupt soil and water systems.
5. The national forests are to manage natural resources, the gas originates outside the forest.
6. The gas will be sold outside the US.
7. Nature is sacred, better left untouched and unexploited.
