Comments: Putting a mine on one of the most beautiful sections of river in the world is sure to pollute the area and tarnish the reputation of a wild and scenic location. This river has lots of commercial activity and supports many jobs and small businesses. Tarnishing the rivers clear cold flow of clean water would diminish commercial activity and not persevere this unique natural resource we have. Considering other uses of this land would be very valuable and it would be wise to conduct more studies on the impact of this project on the environment around the mine and the river as a whole.
