Comments: I am in OPPOSITION of the Stibnite mine moving forward in production. I am a river guide on the Salmon and Snake river for Salmon Raft out of McCall. After working on these rivers for two seasons, I've developed a deep love for our clean waters and the natural beauty. Creating this mine will be extremely detrimental to our local waterways that we love so dearly and need to protect. This project also has a massive effect on our fish. Please consider the damage that would be done not only to our natural environment but our human well being.
