Comments:

The Stibnite Gold Project puts both the Frank Church-River of No Return Wilderness and the East Fork of the South Fork of the Salmon River at risk as well as endangered species such as salmon, steelhead, and bull trout.

Road construction and mining operations would cause serious impacts to the River of No Return Wilderness, including incredible noise, wildlife disturbance and displacement, increased access to and activity in what are now quiet places in the Wilderness, and sediment pollution in streams within the Wilderness.

The wilderness evaluation erroneously downplays these impacts.

The new proposed road would sit 100 feet from the wilderness boundary or could even enter the Wilderness, as the most logical location for the road seems to be an existing pack trail that dips into the Wilderness.

The last thing this area needs is more toxic mining and associated impacts.

Please deny the permit for Perpetua Resource's Stibnite Gold Project and require Perpetua to finish cleaning up the mine site.

Thank you for your attention to this.
