Comments: 45 years ago my husband and I hiked into the Frank Church River of No Return Wilderness to the Salmon River. It was one of the most memorable experiences of my life. To think that this Wilderness is threatened by mining operations that have devastated the west is beyond my comprehension. How can we continue to jeopardize our wild areas for pure profit? The environmental assessments are not adequate to protect the wilderness area. The fisheries are endangered by the mining as well as air quality, water quality, and wildlife habitat, Do not let this project happen. I want my children to be able to have the same opportunity to experience this beautiful wilderness area.
