Comments: I do not support any development of the gold mine in this region! The fisheries are already under so much stress and the added pollution that gold mines continuously impact the environments and mishaps that occur are too dangerous to this keystone fishery that is already on cusp of its own survival. Please listen to the experts on fisheries and wildlife management not resource extraction. The value to extract the gold may be tempting but the value of this fishery is priceless and cannot be replaced. Make the right choice
