Title:

Comments: I am writing in opposition to the Stibnite Gold Project EIS #50516. Water must be protected at all costs against the interests of corporate money chasers who plunder regions and then abandon them regardless of the destruction in their wake, which is all this is. It is time we find new ways to address our resource needs and continued extraction at the cost of the safety of our rivers and streams are not part of any acceptable solution. This mine simply must not be allowed to move forward.
