Comments: The earth is in crisis, and to save our planet our actions must be for the earth, not for profit. One urgently needed action is for The Forest Service to deny the permit for Perpetua Resource's Stibnite Gold Project and require Perpetua to finish cleaning up the mine site. The Stibnite Gold Project puts not only the famed Frank Church-River of No Return Wilderness at risk, but also the East Fork of the South Fork of the Salmon River and endangered species such as salmon, steelhead, and bull trout.

The wilderness evaluation erroneously downplays the impacts road construction and mining operations would have on the River of No Return Wilderness, including noise audible from a nearly 2-mile radius, wildlife disturbance and displacement, increased access to and activity in what are now quiet and lightly-visited places in the Wilderness, and sediment pollution in streams within the Wilderness.

Please help save the earth by taking urgent action.

Thank you.
