Title:

Comments: Please do not approve this mine. The current plan fails to reach a reasonable level of clean up post mining activity. I do not trust Perpetua Resources to hold themselves accountable for any damages to the watershed now or in the future.

The threat to the salmon habitat is too great in a world where we have already decimated these fish populations. Also, the threat to recreation access is far too great in a world where access is being limited more and more everyday.

This project is dangerous on so many levels. PLEASE DO NOT APPROVE THIS!
