Comments: Do not approve of this mining project, I urge you. Once a mine is added to the environment and the complex relationship with the ecosystem and animals that live there it will leave a detrimental force for generations to come. The citizens of Idaho care deeply about their state and I am so fortunate to live here I will do anything to protect it. This is an irresponsible wreckless and thoughtless proposal because it lacks any wisdom about what it actually means to be a steward to public land. As a passionate voter, graduate student, aunt, and ketchum citizen i vehemently ask you to NOT approve this mining proposal to protect the natural landscape and resources that need us making wise choices in order for its protection. Thank you.

Sincerely,

Brittni Adams
