Comments: Dear Forest Service

My name is Nate Scales and I am an active user of our national lands. I would like to register my comment for No Action for the Stibnite Gold project in the East Fork of the South Fork of the Salmon river. My family and I enjoy hiking and floating in that country. I believe the gold project will negatively impact our recreational experience. I believe the gold project will have a serious negative impact on the wildlife, fisheries and water quality in the area, and downstream. We need to protect the remaining wild spaces we have.

Please vote no for the Stibnite Gold project in the East Fork of the South Fork of the Salmon river.

thank you for your consideration
