Comments: To Whom it May Concern,

As a long-term, multi-generational resident of Valley County and the West Central mountains of Idaho, it is my opinion that the Stibnite Gold Project EIS #50516 is simply too great of a risk to our natural environment and communities. I'm simply not convinced that the mining company has the incentive to follow through on their promises of safety and restoration and that there are inadequate accountability measures to ensure they are true to their word.

Sincerely,

Anita Cussler
