Comments: I'm just going to dive right in and say I disagree with the gold mining. I think it could cause a lot of damage to the surrounding environment. Debris could be pushed in the river and start hurting all of the land and fish. This littering from the mining could have a mass amount of consequences.why would we need more gold? To make jewlrey? A luxury? Nobody actually needs gold. Leave the poor environment alone for crying out loud. I think we've done enough.
