Title:

Comments: As a citizen who believes in our continual stewardship of our public lands, I must oppose the expansion of this mine. The potential disaster at the headwaters of one of Idaho's most important rivers/watersheds far outweighs any economic bump. I speak up for the public and future generations of people who want to enjoy the river and land. Given that the proposed expansion would be compromised of a majority of public owned land, I believe that the public should have the most say.
