Comments: Hello,

As a river guide of 10 years on the main salmon and middle fork, I am writing to strongly discourage the forest service to move forward with this mine. The south fork is a precious and vital resource for native chinook and this project would put these already declining species in great danger. This is public land and the public opinion towards this project is NEGATIVE. We do not want this mine on our sacred river. Kindly take all of these words into consideration and reject this proposal to protect some of the only resources left in Idaho.

Thank you

Bobbi Anderson
