Comments: Please vote NO to the Stibnite Mine Plan. The creation of toxic waste will not help the South Fork heal from past mining operations. The project fails to accomplish any goal of cleaning up contamination from previous mining and I do not trust Perpetual Resources and the parties involved to hold themselves accountable for any damages to the South Fork watershed. It's important that we protect and conserve our environment now before it is too late. We are already starting to see the catastrophic climate events destroying our cities, we do need to protect our environment now as much as possible.
