Title:

Comments: Dear Forest Supervisor Jackson,

As you are well aware, the South Fork of the Salmon is a WILDly important section of river for the health of the Salmon River, the Nez Perce Tribe and the populations of Chinook Salmon and Bull Trout. Allowing a "restoration" project endangers the water quality of this vital ecosystem and tributary and allows a nearly 5 mile radius to be at risk of tailings.

I ask Mr. Jackson, that you deny the right to the Stibnite Mine.

Thank you,

Scout Sorcic
