Comments: I submitted before. I am submitting for my 4 family members. We have been cabin owners since the late 1930s. Our concern is about road noise and highway congestion. The trucks will be very heavy and will cause ruts and holes in the road. There's a blind curve at the Stolle Meadows cutoff which also is the main access to cabins on the west side of the lake. Speed on the Warm Lake Highway is a concern. If you are able to use our previous comments we hope you will. We support the mining project. We are looking forward to the promised improvements to the ecosystem.
