Title:

Comments: I submitted before. I am submitting for my 4 family members. We have been cabin owners since the late 1930s. Our concern is about road noise and highway congestion. The trucks will be very heavy and will cause rusts a holes in the road. There's a blind curve at the Stolle Meadow's cutoff which also is the main access to cabins on the west side of the lake. Speed on the Warm Lake Highway is a concern. If you are able to use our previous comments we hope you will. We support tue mining project. We are looking forward to the promised improvements to the ecosystem.
