Title:

Comments: Please do not allow development of the Stibnite Mine. I take regular use of the South Fork Salmon's wilderness resources and feel certain that continuation of this project would jeopardize those resources. As a former and future Idahoan, I believe that the continuation of this project is a detriment to Idaho's citizens. As an American, I believe that the continuation of this project has the potential to damage one of the country's more significant resources-wilderness. I staunchly oppose development of the Stibnite Gold Mine.
