Title:

Comments: When I was little I rafted on the salmon river with my family. Enjoyed fishing and recreation in the clean water. I would like to take my future family on the river and in order for this to Happen, national forest service, you must protect it. It's your job to care for the land. I do not approve of the mine because it will greatly impact important area for wildlife and for recreation making the recreational spots even more busy and popular. The solitude of the river will be no more. I do not approve of the mine. There must be alternatives.
