First name: Dr Mike

Last name: Cohn

Organization:

Title:

Comments: This mine is a huge risk for all of Central and Western Idaho !!! The ramifications of leaks, spills, and other incidents is sure to cause issues for the environment and the wildlife that are unique to this region !!!

Science says this is way too risky to entrust regulations to protect it. I am against this project for all Idaho not just the most exposed area !!!

Thank you for your consideration,

Dr Mike Cohn
