Comments: I oppose the Stibnite Gold Project.

Please extend the comment period to a full 120 days. The extra 45 days will allow more vital public input.

I am concerned about short and long term effects on the Frank Church River of No Return Wilderness, negative impacts on the fish population, restrictions and damage to recreational opportunities, and further environmental degradation in the region.

I am a frequent visitor to Idaho and cannot imagine allowing the Stibnite Gold Project to move forward. The years and years of work by so many individuals and agencies to protect the natural beauty and recreation opportunities in Idaho should receive the highest consideration.
