Title:

Comments: Please stop do not provide approval for the stinbite mine project on the south fork of the salmon river. It would irrevocably harm a precious public resource, that exists almost entirely on Public Land. The communities in central Idaho have been resolute in their opposition to this project for a long time, and to ignore their wishes and the downstream impacts that would inevitably result from this project would be a shameful dereliction of your duty to act as a steward of the publicly owned lands in the United States.
