Comments: I want to comment on the Stibnite Gold Project SDEIS. I have lived and worked here in McCall for over 37 years and watched this community grow into a recreation mecca. We have outgrown the need to extract minerals from our fragile ecosystem and I hope you choose the NO-ACTION ALTERNATIVE.

All the studies I have seen do not prove there will not be a failure. There will be a failure in one of the aspects of this project and no money can buy the ecosystem back.

Please, choose the NO-ACTION ALTERNATIVE!
