Comments: Thank you for allowing the me to submit my comments regarding my concerns regarding the Stibnite Gold Project. I urge you to select the "No Action Alternative" as I do not believe a mining project of this scope can be built and implemented without severe environmental and long term economic harm.

I am a retired Idaho steelhead outfitter and Trout Unlimited Restoration Project Manager. I am not a scientist or biologist. I have spent 5 decades and a lifetime of experiencing healthy rivers as well as rivers impacted by mining legacy impacts.

Please do not put at risk on of Idaho's most pristine rivers for the relative short term economics of this mine.
