Comments: The forest service , as keeper and protectors of public lands should not even entertain this proposal. This mine will affect endangered species, tribal treaty rights and recreation for the Salmon river as well as opening lawsuits from the effects of heavy metals.

I am shocked I even have to make a comment about this mine. I would think the forest service should, at the very least, be protecting our endangered fish runs. I would also think the tribes would not allow a mine on their treaty hunting grounds.

Please do not let this mine go through.
