First name: Zander

Last name: Ulmer

Organization:

Title:

Comments: Please do not support the stibnite mine on the SF Salmon. This project will release heavy metals such as mercury and chemicals like Cyanide into the river. This will greatly affect salmon and bull trout habitat and poison all of the fish in the south and main salmon. Destroying all of this habitat and contaminating one of the most beautiful rivers in the world would be an utter shame. Please do not support this project.
