Comments: As a sovereign citizen of planet earth I do not consent to the actions that are being taken to allow gold mining near the salmon river that would effect the ecosystems homeostasis. Any actions taken permitting the stibnite gold mine my follow by preventive measures including protest, influence of the project and consequences by and from active community members and natural rights activists whom will not stand for those who wish to disregard nature and those who defend it! Please consider the right thing to do and prevent this project from being pursued for various reasons one being the most important which is to disregard the effects it will have on the ecosystem all for a few peoples selfish, personal greed! Thank you!
