Comments: GOLD IS NOT A NECESSITY! DENY APPROVAL OF THE STIBNITE MINE PROPOSAL!

Gold does not save lives. Destroying the unique/pristine waters and land around the Stibnite Gold Project for the sake of the riches of a few investors and processors would be a crime against nature and all who appreciate the natural beauty and clean waters in the Great State of Idaho. Yes there is a long history of mining in Idaho, but that does not justify destroying yet another unique place, and killing fish and wildlife for fleeting profits. Enough is enough! Save this river for the salmon!
