Comments: The Stibnite Gold Project will put the Frank Church River of No Return Wilderness at risk, the East Fork of the South Fork of the Salmon River, and harm endangered species of salmon, steelhead, and bull trout. It would also cause noise pollution threatening and disturbing wildlife. The last thing this area needs is more toxic mining and associated impacts. The Forest Service needs to deny the permit for Perpetua Resources' Stibnite Gold Project and require Perpetua to finish cleaning up the mine site. I am very opposed to this proposed new project and hope the Forest Service does the right thing and denies the permit to Perpetua Resources, who left a toxic mess the first time they were there.
